Hey kids!

In road traffic, it is very important to always be attentive. This is the only way to identify dangers at an early stage. And do you know what else protects you? If other road users can see you well. On the following pages you will learn even more about these topics. Enjoy!

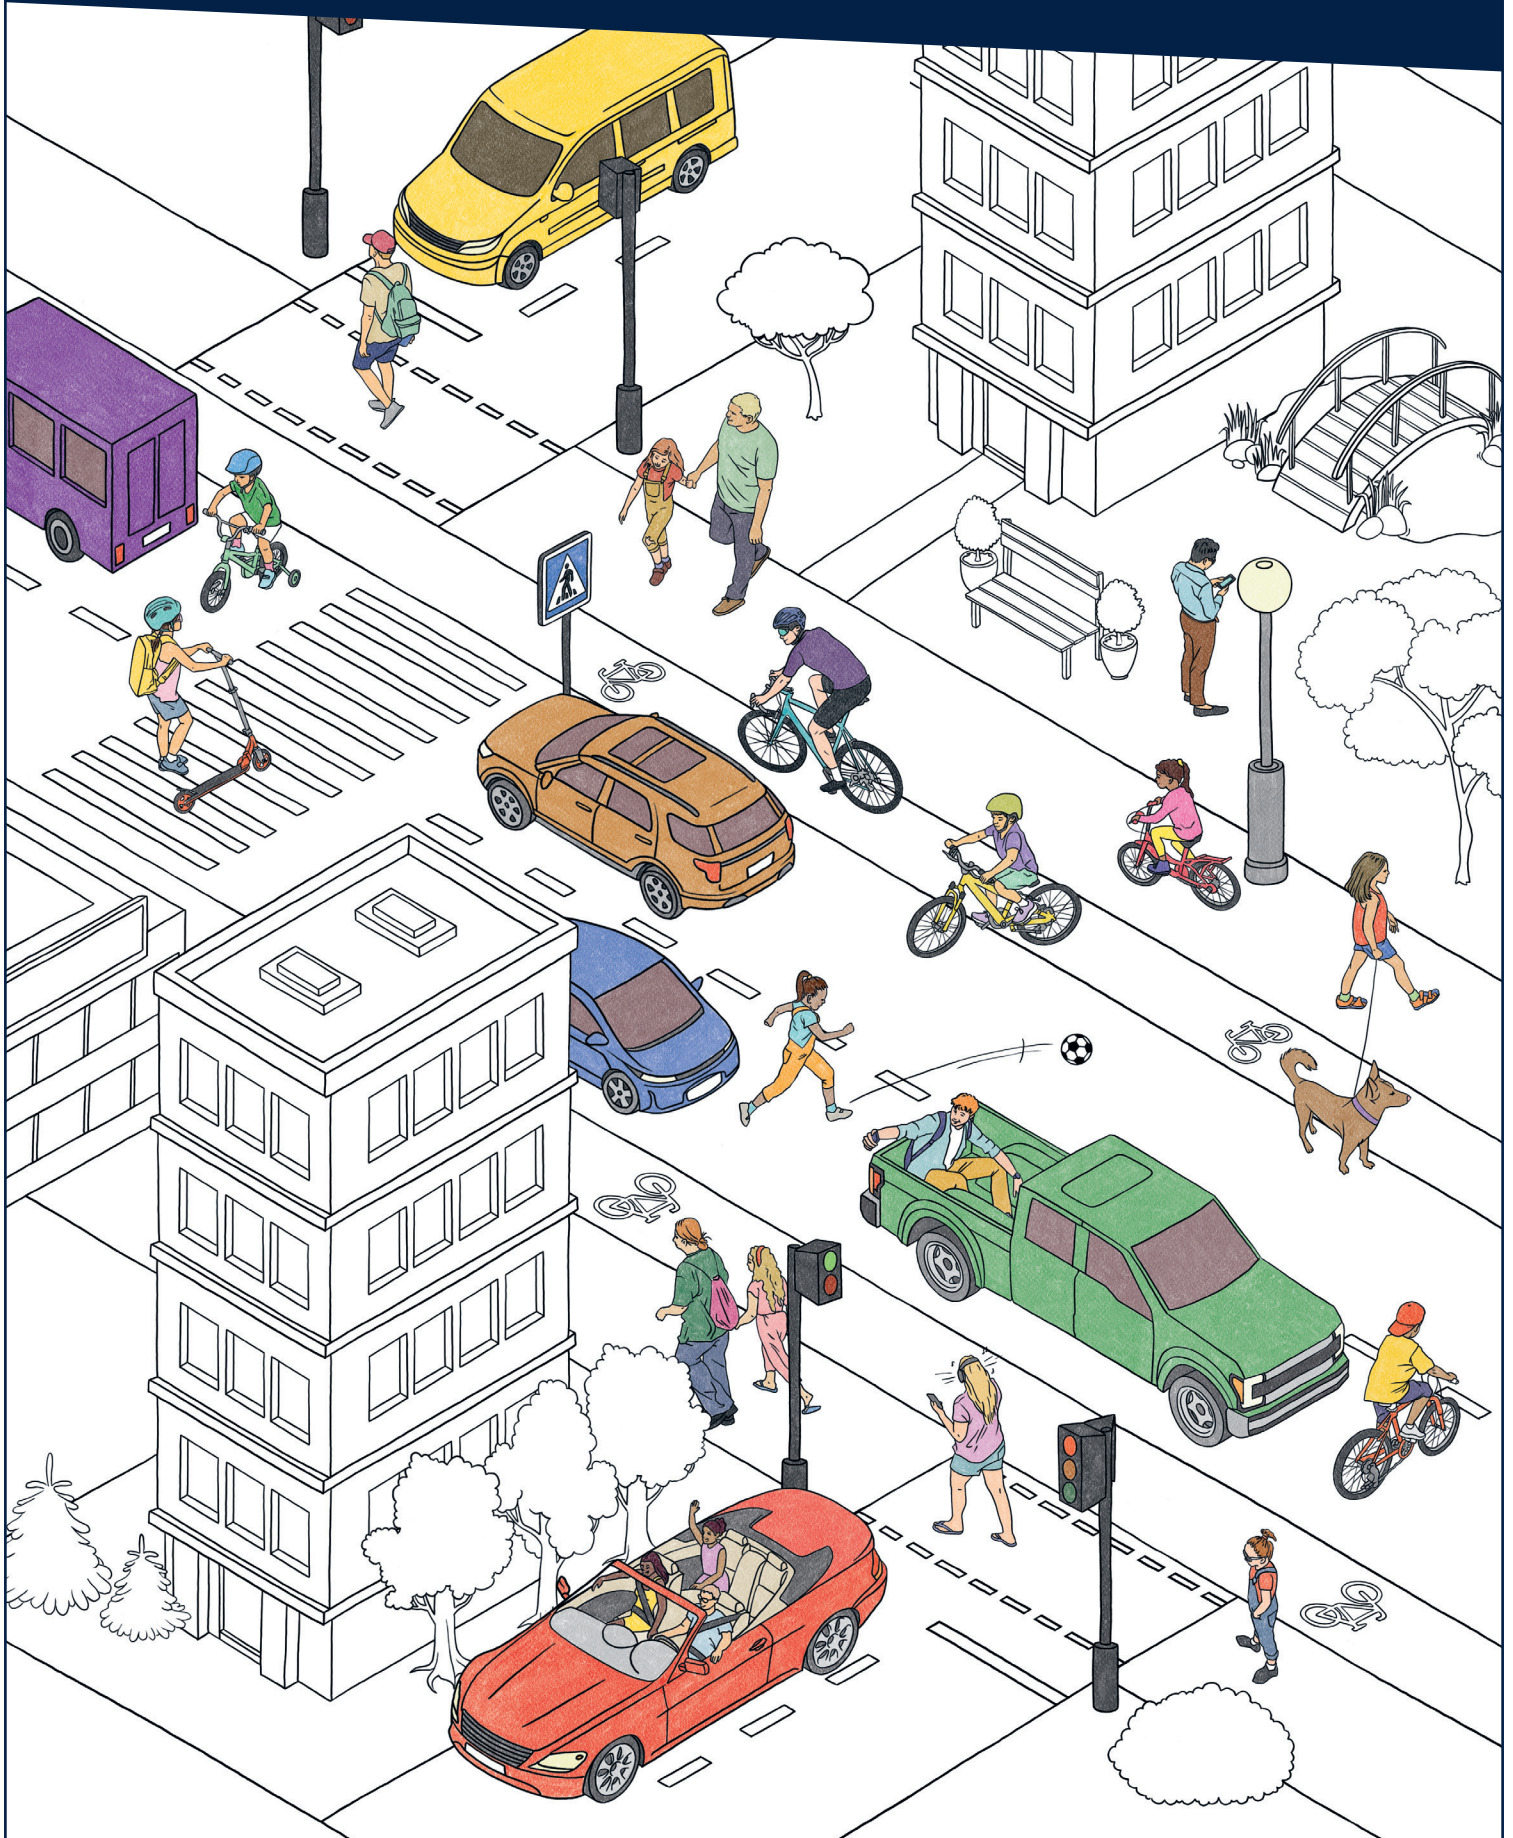

Attention in road traffic is so important

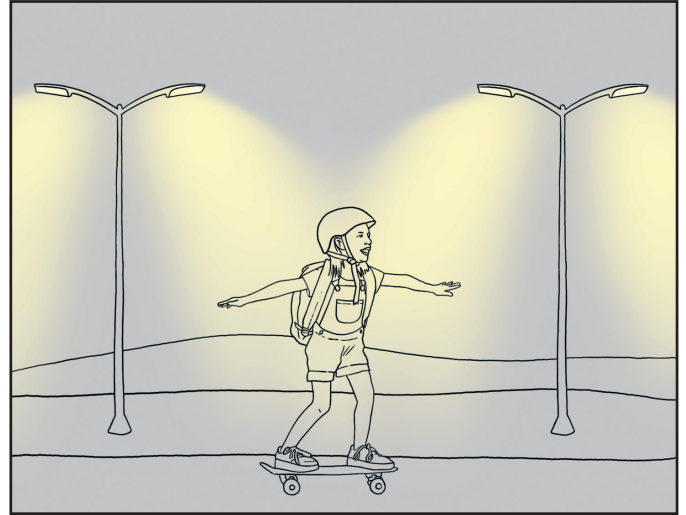

Finding mistakes in road traffic

Well, do you notice anything? Exactly, in our hidden object picture you can see several people making mistakes. Can you find the ten mistakes? Grab a coloured pencil and circle them. Good luck.

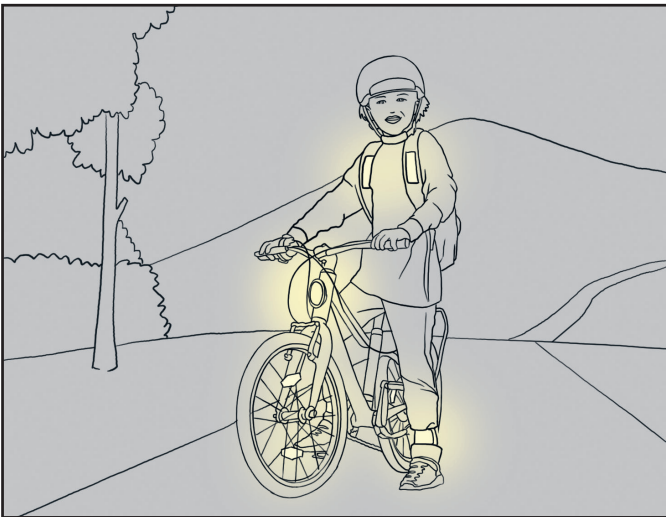

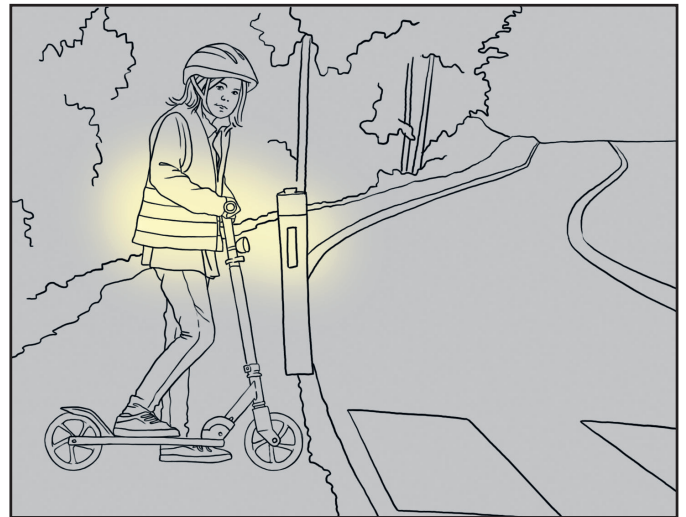

Look, the boy is wearing reflectors on his wrist and the straps of his school bag also reflect the light. This makes him very visible to other road users.

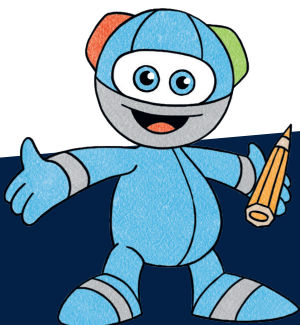

The skateboarder is not just cool, but also safe on the road. Instead of driving on a dark path, where many unexpected obstacles can exist, she chose the illuminated route.

The child on the bicycle cannot be missed due to the reflector straps on the legs and backpack. The cat's eyes on the wheel also reflect the light and make it easily visible in the dark. Clever, right?

The high-visibility safety vest catches your eye in the dark and thus ensures safety. No matter whether the child is riding a bike or standing, motorists can see it early and react immediately. Do you also have a high-visibility safety vest?

Shining through the night

Want to be safe in the dark? Not a problem. Bright clothing and reflectors make you a shining star. As a cyclist, you should also always turn on your lights. And it's best to cross roads only in clearly visible places or even better at traffic lights or zebra crossings.

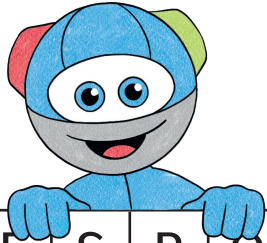

Moritz and Kira visit the light tunnel

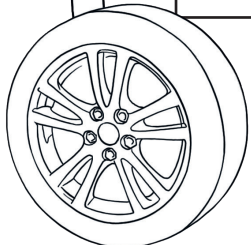

Ready, set, search!

20 words related to road traffic are hidden here. If you find one, circle it with your favourite pencil. Note that the words could be hidden from top to bottom and from left to right. Let's go!
